????????/????????:	Bangkok

Recommended Actions

To perform a vulnerability scan on this target, run the following command:

```
python main.py -t example.com -v --pdf --check-cve
```

Security Recommendations

- * Regularly update and patch all systems
- * Use strong, unique passwords for all accounts
- * Enable two-factor authentication where possible
- * Be cautious about sharing personal information online
- * Regularly monitor accounts for suspicious activity
- * Use encrypted connections (HTTPS) for sensitive transactions
- * Backup important data regularly
- * Use anti-virus and anti-malware software
- * Keep software and applications updated
- * Be wary of phishing attempts in emails and messages

Digital Footprint Awareness

Your digital footprint includes all traces left online, such as social media profiles, comments, and public records. This information can be used by malicious actors for social engineering attacks. Always be mindful of what you share online and review privacy settings regularly.
